Discovering Your Future Career

Course Objectives for High-School Students

"You own your dreams, your happiness and your achievements. The only one who can start this incredible journey is YOU—simply by taking the first step. So are you ready to get started?"

Upon completion of this course participants will be able to:

- Gain self awareness of who you are, your preferences and how you can best use your natural energy and talents to have what YOU want
- Understand what the future holds in terms of college, vocational training and careers
- Understand the difference between a job and a career and why you'd want to go after your perfect work
- Learn what your future employers want and plan your college experience to achieve success
- Choosing Courses, Major's and Careers
- Discover your core values and the environments you'll be most successful in
- Inventory your current skills and identify gaps
- Learn how to present and market yourself to future schools or employers
- Develop your networking skills
- Discover how to talk to those who already do what you think you want to do
- Create your personal branding statement and your vision
- Develop SMART goals to achieve your dreams
- Take ownership for your own destiny and create a blue print to get where you want to go
